

Senior Well Engineers

WellPerform is looking for experienced and versatile Senior Well Engineers to be part of our team in Denmark.

As Senior Well Engineer you will be actively involved in studies, planning and execution of off- and onshore well projects for the oil & gas and geothermal industries. You will play a key role in developing WellPerform and we are looking for motivated and dynamic individuals that are not afraid to take initiative on solving the tasks at hand.

To be successful as a Senior Well Engineer, you will need to possess excellent well engineering expertise, deliver according to given deadlines and have good communication skills.

WellPerform operates in Europe, Africa, South Asia and Middle East and your tasks will be projects in these areas and some business travel must be expected.

JOB DESCRIPTION / AREAS OF RESPONSIBILITIES:

- Ensure compliance with policies, procedures and guidelines
- Ensure that WellPerform Well Delivery Process is followed and documented
- Ensure that reports, programmes and studies are technically optimised, feasible, and realistic
- Mentors, coaches and develops subordinates when required
- Ensure that product deliveries are in accordance to WellPerform and client standards and requirements
- Preparing necessary presentation materials for meetings

MINIMUM REQUIREMENTS:

- Minimum 15 years oil & gas industry experience from similar positions
- Minimum 5 years experience from the North Sea
- Diploma or equivalent Bachelor/Masters degree in engineering
- Proficient user of Landmark Well Engineering Software incl. WellCAT
- Demonstrate excellent communication skills
- Competent user of MS Office, especially Excel and MS Projects
- Ability to work effectively both independently and as part of a team
- Knowledge of Project Management principles
- Proficiency in several languages is a benefit

Please submit your application and CV together with complete documentation of above experience no later than **March 1st 2019**
