

## SENIOR DRILLING ENGINEERS

**WellPerform is looking for two senior drilling engineers. One engineer to provide well design, planning and operational support of drilling operations and one to support the technical excellence wells team in providing functional assurance and support on drilling and well engineering issues.**

As a member of a rig team led by a drilling superintendent, the senior drilling engineer is assisting the drilling superintendent with technical expertise and know-how in planning and managing the day to day operations of the relevant rig(s).

### REQUIRED SKILLS & JOB DESCRIPTION:

- Responsible for providing the drilling engineering input including but not limited to optimized well trajectory, cost estimate for AFE preparation, casing design recommendations for new wells, P&A, infill or re-drills, tubing and zonal completions
- Actively pursue new technology and solutions if deemed beneficial
- Provide drilling support for high risk and critical projects' drilling activities
- Ensure compliance with the Well Delivery Process (WDP)
- Analysis of drilling material requirements to meet programme demands
- Strong background and experience in drilling and workover operations including ability to solve complex problems in an innovative and cost-effective manner
- Maintain a thorough understanding of the HSE standards

### MINIMUM REQUIREMENTS:

- Fluent in English (written and verbal)
- 10+ years industry experience, of which at least 6 years as a Drilling Engineer
- Experienced user of Landmark WellPlan & WellCat
- Bachelor's or Master's Degree in Engineering
- IWCF Well Control Level 4 Subsea (for rig team only)
- Experience in complex well abandonment project execution will be highly preferred

Please submit your application and CV together with complete documentation of above experience no later than **March 17<sup>th</sup> 2017**.
